Income overview

- Premiums up by 17% to DKK 14.2 billion in the first half of 2011.
- Premiums up by 14% in the Danish business and up by 22% in the foreign business.
- Expenses as per cent of provisions in Denmark down from 0.22 to 0.21 and expenses as per cent of premiums down from 5.6 to 4.8.
- Total return to Danish customers of 1.0% or DKK 2,118 million.
- Profit before tax of DKK 405 million realised by the Danica Group, against DKK 824 million for the first half of 2010.

A pension market under change

The Danish Insurance Association releases annual overviews of developments in the Danish pension market net of transfers between companies. According to this year's report, the pension market contracted by 11% from 2009 to 2010 as compared with an average annual increase of 7% during the period 2005-2009.

The negative market growth in 2010 was affected by the tax reform effective from 1 January 2010. Furthermore, the pension market is becoming saturated. Accordingly, companies are making great efforts to capture corporate pension plans from other companies, which puts pressure on prices.

The total premiums in Danica's Danish business increased by 14% compared with the first half of 2010. In the first half of 2011, Danica captured several major corporate plans that are not yet fully reflected in premiums.

62% of life insurance premiums were in the market products. Policyholders still expect the market products to yield the greatest long-term returns. The Danish market products Danica Balance and Danica Link produced a negative total year-to-date return of 1.0% or DKK 0.5 billion, although the average annual return over the past 3 years is positive at 4.7%.

The Danish government entered a deal with the Danish People's Party and the Social Liberals on a reform of the early retirement system. Key measures of the plan include:

- reducing the early-retirement period from five to three years over the period 2018-2023;
- gradually raising the early-retirement age as from 2014;
- offsetting early-retirement benefits against pension savings;
- option of earning tax-exempt premiums through work for up to three years if early retirement is forfeited;
- option of withdrawing payments made to early retirement scheme free of tax in 2012.

A bill will be put forward in the Danish parliament after the upcoming general election. If adopted, the proposal is expected to have a positive impact on the need for pension savings as early retirement will become less attractive.

The Social Democrats and the Socialist People's Party unveiled their 2020 plan, Fair Solution 2020, which touches on the pension area. Their proposals are:

- a total annual cap on pension contributions at DKK 100,000 for term-based annuity pensions and life-long pensions;
- share turnover tax on purchase and sale of equities;
- abolition of tax exemption of health care insurance.

If these proposals are adopted, they are expected to have a negative impact on pension savings.

Financial uncertainty and Solvency II put professional risk management and solid financial strength on the agenda. Danica meets the requirements for both in full.

New customer-directed initiatives in the Danish business

Digitalisation is high on the agenda, and Danica has developed a number of online solutions that make a useful supplement to personal advisory services. Reporting a claim, e.g. on a Danica Sundhedssikring policy, via the website is easy and gives policyholders instant confirmation of insurance cover. Customers can also activate their new pension plans with Danica. Finally, persons in charge of corporate pension plans have online access to such services as registering or deregistering employees.

During the first half, electronic communication was also in focus. Increasingly, Danica customers are opting for digital communication. Rather than receiving physical letters, these customers choose to get letters electronically and save them in an electronic file either in their e-boks or at Din Netpension. At Din Netpension, customers furthermore get a simple overview of types of insurance cover and how their pension savings are developing. Customers can now log on to Netpension using Nem-ID. Here, customers can for example check their pension plan or report a claim at any time.

Advisory services are a top priority at Danica, and during the first half of 2011 a total of 30,000 advisory customer meetings were held, either in person or as e-meetings or telephone meetings. In order to give customers a clearer idea of their disposable amounts on retirement, more than 600 senior analyses were conducted during the first half. Senior analysis is an advisory tool offered to customers 55 years of age or older. The tool and the accompanying talk with an advisor give policyholders an insight into the means at their disposal for their third age.

Effective processes also form part of The Safe Choice. Danica measures all key processes and for the first half, the Company met all service targets set out, which means that more than 90% of all customer inquiries were handled in between five and ten business days.

Danica customers are typically covered by a range of insurances. First half figures show that many also receive benefits from these policies. For example, Danica paid out funds to 25,000 customers during the first half. In addition, 103,000 customers received monthly benefits totalling DKK 3.6 billion from their pension schemes during the first half.

Customers who have questions regarding their pension scheme can call Danicalinjen. During the first half, 113,000 customers contacted Danicalinjen. This figure has declined in the past few years as more self-service functions have become available at danicapension.dk.

**CUSTOMERS WITH BENEFIT PAYMENTS
ETC. IN THE FIRST HALF OF 2011**

Payments relating to disability cover	10,000
Payments relating to cover on certain types of critical illness	650
Payments relating to Danica Sundhedssikring	14,800
Payments of pensions	103,000
Calls to Danicalinjen	113,000
Number of electronic customers	134,000

In collaboration between corporate customers and Danica, an increasing number of those receiving disablement pension have been helped in returning to work. In particular, people suffering from stress have benefitted from this. Two thirds of this group return to work within one to two years.

Danica wishes to support and provide targeted advice for policyholders suffering from critical illness in order to help them to a speedy return to as normal a family and work life as possible. Consequently, Danica has taken the initiative of offering policyholders receiving benefits under their critical illness insurance a one-year membership of one of the following four patient associations: the Danish Cancer Society, Hjernesagen (the Danish Aphasia Association), the Danish Heart Association or the Danish Multiple Sclerosis Association.

Furthermore, during the first half of 2011, an agreement on psychological treatment has been entered into with Falck Healthcare. The arrangement is aimed at customers with Danica Sundhedsforsikring.

The pension industry has made an agreement with the Danish government to provide capital for entrepreneurs and small growth enterprises. In the first half, Danica has committed to making an

investment in Dansk Vækstkapital of DKK 536 million, the largest commitment among the commercial participants.

On 1 July, all pension companies that are members of the Danish Insurance Association have committed to disclosing to their customers all annual expenses in Danish kroner as well as in per cent of savings. In addition to this, the commercial companies must provide an online cost calculator that can calculate expenses according to uniform assumptions. This provides customers with a means of comparing the expenses of different companies. These conditions were agreed collectively by the industry through the Danish Insurance Association. Danica was the first company in the pension industry to launch a cost calculator more than two years ago. Danica's cost calculator has been adjusted to the Danish Insurance Association's new standards as from 1 July.

Strong premium growth

Premiums rose by DKK 2.0 billion to DKK 14.2 billion. This is a 17% increase, which mainly relates to the market products in Denmark, up 31%, and Sweden, where premiums rose 23%.

Total premiums in the Danish business rose by 14% relative to the first half of 2010.

Premiums in the foreign entities amounted to DKK 4.6 billion in the first half of 2011, against DKK 3.8 billion in the first half of 2010, equalling an increase of 22%.

In Sweden, premiums amounted to DKK 3,972 million, against DKK 3,224 million in the year-earlier period, equalling a 23% increase. The premium growth is primarily explained by the continued success of the savings product Depåforsikring.

In Norway, premiums amounted to DKK 583 million, against DKK 543 million in the first half of 2010, equalling a 7% increase. The Norwegian business has signed an agreement with Terra which will boost premiums by approximately DKK 900 million in the second half of 2011.

In Ireland, premiums amounted to DKK 74 million, against DKK 35 million in the year-earlier period. Ireland is one of the countries hardest hit by the financial crisis. Premiums were therefore below expectations.

PREMIUMS (INCLUDING INVESTMENT CONTRACTS)		
(DKK billions)	First half 2011	First half 2010
Danica Balance	4.9	3.4
Danica Link	1.2	1.3
Danica Traditionel	3.7	3.9
Health and accident	0.7	0.7
International	4.6	3.8
Internal transfers	-0.9	-0.9
Total premiums	14.2	12.2

The Danica Group's profit before tax was DKK 405 million, against DKK 824 million for the first half of 2010.

DANICA GROUP, PROFIT BEFORE TAX		
(DKK millions)	First half 2011	First half 2010
Technical result, traditional business	588	572
Technical result, unit-linked business in Denmark	153	107
Health and accident result in Denmark before return on investment	-31	-35
Technical result, foreign entities	27	36
Return on investment	146	521
Risk allowance transferred to shadow account	-353	-177
Special allotments	-125	-200
Profit before tax	405	824

For the traditional business, the technical result amounted to DKK 588 million.

The technical basis for risk allowance provided for the booking of the full risk allowance of DKK 592 million for the four interest rate groups, but in light of the significant financial market volatility and expectations of higher interest rates, the risk allowance was only booked in part for the first half of 2011. In total, risk allowance of DKK 239 million is booked for the interest rate groups for the first half of 2011. If the full risk allowance for the first half is booked at a later date, profit before tax will in total rise by some DKK 300 million. The full risk allowance is not expected to be booked if interest rates rise above the level at the end of June. In case of a 20% drop in equity prices and unchanged interest rates, no risk allowance is expected to be booked.

The technical result of unit-linked business in Denmark amounted to DKK 153 million, against DKK 107 million in the year-earlier period. The improved performance was a result of the increasing volume of business.

The Danish health and accident business before

return on investment posted a loss of DKK 31 million. For the Danica Group, the claims ratio was up from 87% in the first half of 2010 to 92% in the first half of 2011. The claims ratio was adversely impacted by lower prices. The booking of a positive run-off result of DKK 50 million had a positive impact.

The technical result of foreign activities before tax was a profit of DKK 27 million, against DKK 36 million in the first half of 2010. The performance of the foreign activities was adversely impacted by a lower risk result in Sweden.

The investment return was DKK 146 million, against DKK 521 million in the first half of 2010. The decline was mainly due to lower bond yields.

Special allotments were recognised in the amount of DKK -125 million in the first half. The final expenditure for 2011 will depend on how Danica's earnings and business volume progress. In March, customers entitled to special allotments had a total amount of DKK 681 million added to their savings in respect of 2009 and 2010.

Volatile financial markets

The investment return for the first half of 2011 was marked by strong market volatility fuelled by disappointing economic growth figures from the USA, the Middle East crisis, the Greek debt crisis and the natural disaster in Japan. As a consequence, equity prices were very volatile in the first half. Measured in terms of the world index, equity prices ended the first half at an almost unchanged level, but with significant fluctuations during the period.

Interest rates continued to rise in the first half, particularly in short maturities, resulting in low returns on bonds.

The overall return for Danica Balance and Danica Link customers for the first half was a negative DKK 0.5 billion, corresponding to a negative return of 1.0%.

DANICA BALANCE, RETURN BEFORE TAX				
FIRST HALF 2011				
(%)	30 years to maturity		5 years to maturity	
Risk	Return	Equity share	Return	Equity share
Aggressive	-0.1	100	0.4	59
High	-0.1	100	0.5	49
Medium	0.1	90	0.6	38
Low	0.2	75	0.7	27
Conservative	0.5	49	0.9	16
Average return, Danica Balance 0.0%				

The overall return for Danica Balance customers in the first half was DKK 0.0 billion, corresponding to a return of 0.0%. The average annual investment return over a five-year period was 3.6%.

The overall return for Danica Link customers for the first half was a negative DKK 0.5 billion, corresponding to a negative return of 2.1%. The average annual investment return over a five-year period was 2.9%.

DANICA LINK VALG PORTFOLIO'S RETURN BEFORE TAX			
(%)	First half 2011	First half 2010	
Danica Valg Guarantee	0.0	3.4	
Danica Valg 100% Bonds	2.0	4.2	
Danica Valg Low Risk	0.5	4.2	
Danica Valg Medium Risk	-1.4	5.3	
Danica Valg High Risk	-2.0	5.3	
Danica Valg 100% Equities	-3.8	5.8	
Average return, Danica Link	-2.1	5.1	

The return on investment of customer funds in Danica Traditionel was DKK 2.1 billion or 1.1% in the first half of 2011 before tax on pension returns. After recognition of DKK 1.7 billion from reduced life insurance provisions, the return was 2.2%. In the first half, interest after tax on pension returns of DKK 2.2 billion was accrued to policyholders' saved-up funds.

Listed equities generated an overall negative return of 0.2%, whilst bonds generated a positive return of 1.2%. Interest rate hedging instruments contributed adversely to the overall performance. The return on properties was 2.2%, against 2.0% for the first half of 2010. The valuation of the Company's properties is based on market return requirements of an average of 6.2% for office buildings and 6.0% for shopping centres. The return requirements were fairly stable relative to 2010.

DANICA TRADITIONEL, CUSTOMER FUNDS				
HOLDINGS AND RETURNS (DKK billions)	First half 2011		First half 2010	
	Value	Return %	Value	Return %
Property investments	18.9	2.2	18.4	2.0

Other financial assets	0.0	-	5.3	-
Total	182.6	1.1	192.3	5.4
Return after change in additional provisions		2.2	-	1.9

Customer funds for Danica Traditionel totalled DKK 182.6 billion at the end of June 2011, consisting of 9.2% equities and alternative investments; 16.3% credit bonds; 10.3% property and 64.2% other bonds including derivatives. At the end of June 2011, the asset allocation in the new business category was 15.5% equities and alternative investments; 9.1% property; 13.1% credit bonds; and 62.3% other bonds.

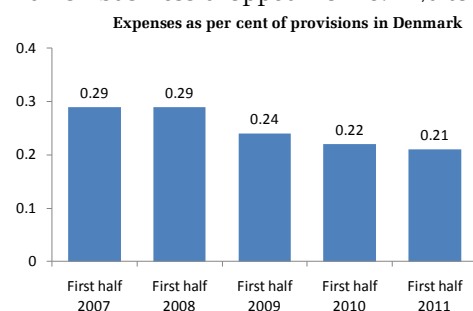

Danica's investments in Irish, Italian and Spanish government bonds amounted to 2.8% of customer funds at the end of first half 2011. No investments were made in Portuguese or Greek government bonds.

Continued cost reductions in the Danish business

Operating expenses relating to life insurance amounted to DKK 597 million for the first half of 2011, against DKK 567 million in the year-earlier period. The increase relates to a reimbursement of financial services employer tax of DKK 32 million in 2010 and increasing acquisition costs in the foreign business. In Denmark, expenses were down 2%, and by 8% when adjusting for financial services employer tax. In the Danica Group, the expense ratio was down from 5.0% in the first half of 2010 to 4.4% in the first half of 2011, and for Danica's Danish activities, the expense ratio dropped from 5.6% in the first half of 2010 to 4.8% in the first half of 2011.

EXPENSE RATIO	First half 2011	First half 2010
Danica Group	4.4	5.0
Danish activities	4.8	5.6

Measured relative to provisions, the expenses in the Danish business dropped from 0.22% to 0.21%.

The cost result of Danica Pension's traditional business was DKK 18 million, distributed among four cost groups, one of which posted a profit of DKK 17 million. The three remaining cost groups' loss of DKK 35 million was paid through shareholders' equity.

Continued significant financial strength

At the end of June 2011, the balance sheet total stood at DKK 294 billion and total investment assets including unit-linked assets amounted to DKK 287 billion, a 3% increase over the year-earlier period.

Provisions for unit-linked contracts rose from DKK 66 billion at the end of 2010 to DKK 73 billion at the end of first half of 2011.

Combined with an annual 3.25% rate of interest on policyholders' savings before tax on pension returns, the investment return after tax meant that DKK 0.7 billion could be added to the collective bonus potential.

CHANGE IN COLLECTIVE BONUS POTENTIAL (DKK billions)		
	First half 2011	First half 2010
Return on customer funds before investment costs (life)	2.1	9.9
Investment costs ¹⁾	-0.2	-0.2
Change in the value of insurance obligations	1.5	-6.6
	3.4	3.1
Tax on pension returns	-0.2	-1.3
Interest added for the period after tax on pension returns	-2.2	-2.4
Cost and risk results, etc.	0.0	0.2
Risk allowance of provisions	-0.6	-0.6
Transferred to shadow account	0.4	0.2
Change in collective bonus potential	0.7	-0.8

¹⁾ Including estimated indirect costs

The collective bonus potential is distributed among four interest rate groups. See the below table. To this should be added DKK 148 million in collective bonus potential for the risk groups and DKK 17 million for the cost groups.

DISTRIBUTION ON INTEREST RATE GROUPS AT 30.06.2011

(%)	Policyholders' savings before tax on pension returns	Investment return	Collective bonus potential (DKK billions)	Bonus ratio
Interest rate group 1 (new customers)	3,25	1,5	0,4	0,7
Interest rate group 2 (low guarantee)	3,25	1,4	0,2	0,7
Interest rate group 3 (medium guarantee)	3,25	0,4	0,4	2,8
Interest rate group 4 (high guarantee)	3,25	0,8	1,5	2,1

The charge on customer funds amounted to 0.46% in the first half of 2011 before transfer to the shadow account. At 30 June 2011, the shadow account stood at DKK 353 million.

CHARGE ON CUSTOMER FUNDS IN DANICA TRADITIONEL (DKK millions)

	First half 2011	First half 2010

Subordinated loan capital	10	10
Administrative expenses related to investment activities ¹⁾	220	240
Charge for the period, interest rate groups	822	805
In % of provisions	0.48	0.45
Risk allowance (share of risk result)	24	0
Risk result	-50	-36
Cost result	-17	-11
Total charge for the period	779	758
In % of provisions	0.46	0.42
Transferred to/from shadow account	-353	-177
Total charge including shadow account	426	581
In % of provisions	0.25	0.32

¹⁾ Including estimated indirect costs

At the end of June 2011, the Group's shareholders' equity totalled DKK 19.5 billion. The capital base stood at DKK 19.1 billion compared with a solvency requirement of DKK 7.8 billion. The financial strength is down by DKK 2.0 billion since the beginning of the year. The repayment of the subordinated loan has reduced the Group's financial strength by DKK 3.0 billion, whereas the increase in collective bonus potential has increased the financial strength by DKK 0.7 billion.

The Group's financial strength, i.e. capital base and collective bonus potential less solvency requirement, amounted to DKK 13.8 billion at the end of June 2011. To this should be added a bonus potential of paid-up policies of DKK 12.6 billion, part of which can be used for offsetting capital losses.

Danica's sturdy financial strength is a contributing factor in the Company's A rating with Standard & Poor's.

Throughout the first half of 2011, Danica maintained a green light in terms of the Danish FSA's risk scenarios.

In 2011, Danica has continued its preparations for the coming EU solvency rules (Solvency II). For the time being, it is uncertain whether the rules will be implemented as from 1 January 2013 as previously announced. Calculations indicate that Danica will not have any difficulty meeting the capital requirement.

Events after the balance sheet date

No events have occurred between 30 June 2011 and the date of the signing of the financial statements that, in the opinion of the management, will materially affect the financial position of the Company.

Outlook for 2011

The profit is expected to be lower than in 2010, which was positively affected by the booking of the shadow account from previous years and a large return on investment activities. The risk allowance is only expected to be booked in part for 2011 due to expected interest rate increases. Expectations as to the size of the investment return and risk allowance for the full year are subject to uncertainty as they are dependent on financial market developments, including in particular developments in interest rates and equity prices.

Danica expects to see a fair increase in premiums for the Danish activities relative to 2010 and a greater increase for the foreign activities.

Expenses as per cent of premiums are expected to be lower for 2011 than for 2010.

Danica Pension's subordinated loan of DKK 3 billion will be repaid in October 2011. The investors have been informed on 8 August 2011.

Danica Pension has an obligation to allocate part of the excess equity to certain policyholders of Statsanstalten for Livsforsikring (now part of Danica Pension) if the percentage by which the equity exceeds the required capital base is higher than the percentage that had been maintained by Statsanstalten for Livsforsikring prior to the privatisation of this company in 1990. In addition, it is the intention not to distribute dividends for a period of at least 25 years from 1990. Paid-up capital and interest accrued thereon may, however, be distributed.

The share capital is made up of 1,000,000 shares of a nominal value of Dkr 1,000 each. All shares carry the same rights; there is thus only one class of shares.

During the first half of 2011, an amount of DKK 353 million was added to the shadow account. The balance of which was thus DKK 353 million at 30 June 2011

Notes – Danica Group

Note

1 Accounting policies

The Group's interim report for 2011 has been prepared in accordance with IAS 34, Interim Financial Reporting as adopted by the EU and in accordance with the Danish Statutory Order on Adoption of IFRS for financial enterprises.

The accounting policies are consistent with those of the Annual Report for 2010, which gives a comprehensive description of the accounting policies applied. The information has been adapted to reflect the amendments to IAS 34 as part of Improvement 2010.

Audit

The interim report has been neither reviewed nor audited.

Accounting estimates and assessments

The preparation of the financial statements is based on the management's estimates and assessments of future events that will significantly affect the carrying amounts of assets and liabilities. The amounts most influenced by critical estimates and assessments are the same as at the end of 2010:

- Liabilities under insurance contracts
- Fair value measurement of financial instruments
- Fair value of real property

For a more detailed description of these and for a description of the most significant risks and external factors that may affect the Group, we refer to the Annual Report for 2010.

Change in accounting estimates

Change in accounting estimates following the Danish Financial Supervisory Authority's benchmark for mortality rates does not materially affect provisions for insurance liabilities.

Standards and interpretations not yet in force

The International Accounting Standards Board (IASB) has issued a number of amendments to existing international financial reporting standards that have not yet come into force. The section below lists the standards and interpretations that may be relevant to the financial reporting of the Group.

In October 2010, the IASB issued IFRS 9, Financial Instruments. This standard represents phase 1 of a process to replace the rules of IAS 39 during 2011. After implementation of phase 1, IFRS 9 deals with classification of financial instruments and derecognition, while the next phases will address impairment, hedge accounting and offsetting of financial assets and liabilities. The transitional rules adopted in IFRS 9 (phase 1) imply implementation of the standard by 2013. However, a postponement of the implementation deadline until 2015 is currently under consideration. The EU has decided to postpone adoption of IFRS 9 until the details of the remaining phases are known.

The Group does not expect IFRS 9 (phase 1) to materially affect the measurement of its financial instruments. Meaningful classification and measurement of financial instruments is not possible without information about the future content of IFRS 9 to clarify the overall accounting effects of the standard.

In May 2011, in connection with the IASB's consolidation project, a number of new standards (IFRS 10, IFRS 11 and IFRS 12) and amendments to existing standards (IAS 27 and IAS 28) were issued. This introduced a single definition of control as the basis for identification of a group relation. Classification of joint arrangements was changed and in future, pro rata consolidation will only be used for arrangements classified as joint operations. In addition, the disclosure requirements for consolidated as well as non-consolidated entities and for joint arrangements and associates have been extended. These standards, which have not yet been approved by the EU, must be implemented by 2013. No changes to the Danica Group's composition are expected, and the Group's joint arrangements are still expected to be consolidated on a pro rata basis.

In May 2011, IFRS 13, Fair Value Measurement was issued. With this standard, a new definition of and guidance on fair value measurement was introduced, and the standard comprises disclosure requirements on the measured fair value. The provisions of this standard must be applied in situations in which another standard stipulates recognition at fair value or fair value disclosure. This standard, which has not yet been approved by the EU, must be implemented at 1 January 2013. The implementation is not expected to have any material financial effect.

2 BUSINESS SEGMENTS

The group's business segments are based on differences in products. The segment Traditional covers traditional life insurance and pension plans with guaranteed benefits and Forenede Gruppeliv, while the Unit-linked segment covers market return pension plans. The Health and accident segment covers non-life insurance, which in addition to health and accident insurance comprises the products Sundhedssikring (health care), Kritisk Sygdom (critical illness) and Sundhedsfremmer (offer of health check).

4 FINANCIAL INSTRUMENTS

Financial instruments are recognised in the balance sheet at either fair value or amortised cost. See note 35 in the annual report 2010. The classification is unchanged.

The fair value is the amount for which a financial asset could be exchanged between knowledgeable, willing parties. If an active market exists, the market price is applied. If an active market does not exist, which is the case for a number of financial assets and liabilities, a discounted cash flow or other generally accepted estimation and valuation techniques based on market conditions at the balance sheet date are used to calculate an estimated value.

30. June 2011	Quoted prices	Observable input	Non-observable input	Total
Financial investment assets	176,300	5,504	4,082	185,886
Unit-linked investments	71,848	-	-	71,848
Total financial assets	248,148	5,504	4,082	257,734
Derivatives	1,864	495	-	2,359
Provisions for unit-linked investment contracts	-	24,770	-	24,770
Total financial liabilities	1,864	25,265	-	27,129

31. December 2010

Financial investment assets	183,324	4,108	4,724	192,156
Unit-linked investments	66,261	-	-	66,261
Total financial assets	249,585	4,108	4,724	258,417
Derivatives	2,547	324	-	2,871
Provisions for unit-linked investment contracts	-	22,397	-	22,397
Total financial liabilities	2,547	22,721	-	25,268

At 30 June 2011, financial instruments measured on the basis of non-observable input comprised unlisted shares DKK 3,814 million and illiquid bonds DKK 268 million.

Valuation based on non-observable input	June 30, 2011	Dec. 31, 2010
Fair value, beginning of year	4,724	4,157
Fair value through profit or loss	180	566
Purchase	693	1,366
Sale	-320	-720
Transferred to quoted prices and observable input	-1,195	-645
Fair value, end of period	4,082	4,724

Transfer to listed prices and observable input is essentially due to the fact that for a larger part of the total bond portfolio, the most recently published price is deemed to reflect the 30.06 value.

Bond prices have been negatively impacted by in particular the rise in short-term interest rates during the period.

Equity prices are relatively unchanged, but the markets were very volatile during the period due to the great uncertainty in the wake of such events as the debt crisis in Greece, the Middle East crisis, the absence of economic growth in the USA and the natural disaster in Japan.

Statement by the Management

The Board of Directors and the Executive Board (the management) have considered and approved the interim report of Forsikringsselskabet Danica, Skadeforsikringsselskab af 1999 A/S for the period starting on 1 January 2011 and ending on 30 June 2011.

The consolidated interim financial statements are presented in accordance with IAS 34, Interim Financial Reporting as adopted by the EU, while the interim financial statements of the parent company are presented in accordance with the Danish Financial Business Act. The interim report is further presented in accordance with the Danish supplementary information requirements.

In our opinion, the interim financial statements give a true and fair view of the Group's and the Parent Company's assets, liabilities, equity and financial position at 30 June 2011, and of the results of the Group's and the Parent Company's operations and the Group's cash flows for the period starting on 1 January 2011 and ending on 30 June 2011. Moreover, in our opinion, the management's report includes a fair review of developments in the Group's and the Parent Company's operations and financial position and describes the significant risks and uncertainty factors that may affect the Group and the Parent Company.
